## 2-4: Practice Solving Equations With Variables on Both Sides

Work Step by Step.  $2b + 4 = -18 - 9b$ .

## Bookmark File PDF 2 4 Practice Solving Equations With Variables On Both Sides

First, you need to get the variable (b) on one side of the equation, so add 9b to both sides of the equation. This will remove the b from the right side of the equation.  $2b + 4 + 9b = -18 - 9b + 9b$ . Simplify to get this:  $11b + 4 = -18$ . Subtract 4 from each side.  $11b + 4 - 4 = -18 - 4$ .
