A Non-Random Walk Down Wall Street invites scholars to reconsider the Random Walk Hypothesis, and, by carefully documenting the presence of predictable components in the stock market, also directs investment professionals toward superior long-term investment returns through disciplined active investment management.

A Non-Random Walk Down Wall Street By Andrew Lo, Archie ...

The non-random walk was composed by Andrew Lo, who is a non-random proponent, with a conclusion that there are many techniques that can be used to beat the major averages, but the question remains for how long can these methodologies be successful. Lo said, “The more creativity you bring to the investment process, the more rewarding it will be.

Random vs. Non-Random Walk Theory in the Financial Markets ...

A Non-Random Walk In contrast to the Random Walk Theory is the contention of believers in technical analysis – those who think that future price movements can be predicted based on trends, patterns, and historical price action.
