The experiment was conducted in a laboratory indoors. 1. Construction of the pendulum. We constructed the pendulum by attaching a inextensible string to a stand on one end and to a mass on the other end. The mass, string and stand were attached together with knots. We adjusted the knots so that the length of the pendulum was (1.0000 ± 0.0005) ...

Scientists do experiments to find answers to problems. If the experiment is not set up correctly or not followed rigorously, the results of the lab may not be valid. To make sure the results of experiments are valid, scientists frequently set up the experiment with a . control. and . variables. A . variable. is a factor in the experiment that is changed in order to see a different experimental result. The . control

Having drinks in the lab risks your experiment, too. You could spill a drink on your research or lab notebook. Eating and drinking in the lab is a form of distraction. If you are eating, you aren't concentrating on your work. If you're used to drinking liquids in the lab, you might accidentally reach for and drink the wrong liquid.
