On top of the SPS, install the SPE. DAE. On top of the SPE, install the DAE containing the vault drives. DAE - The Rest of them. Install the rest of the DAE's. SPA/B and Backend Cabling. The backend cabling is the first cable job. Depending on the CX4 model, you will have either 1, 2, or 4 backend ports.

Data Center Life: EMC Clariion CX4-240 Self Install

EMC offers a built in zerodisk command that writes all zero's to every disk, effectively scrubbing the disks and making data recovery impossible. Using the command in a script for every disk allows for a quick and easy way to zero out all the disks prior to decommissioning the array. It is not a DOD certified method.

How to scrub/zero out data on a decommissioned VNX or ...
