" Historical linguistics studies the nature and causes of language change. The causes of language change find their roots in the physiological and cognitive makeup of human beings. Sound changes usually involve articulatory simplification as in the most common type, assimilation.

An Introduction to Historical Linguistics - ThoughtCo

Introduction to Historical Linguistics Historical linguistics is the study of not only the history of languages, as the name implies, but also the study of how languages change, and how languages are related to one another. It might seem at first that this would be a rather dull, uneventful field of study, but that is far from the truth.

Emily's Introduction to Historical Linguistics

Historical linguistics, also termed diachronic linguistics, is the scientific study of language change over time. Principal concerns of historical linguistics include: to describe and account for observed changes in particular languages to reconstruct the pre-history of languages and to determine their relatedness, grouping them into language families to develop general theories about how and why language changes to describe the history of speech communities to study the history of words, i.e. e
