In simple terms, risk is the possibility of something bad happening. Risk involves uncertainty about the effects/implications of an activity with respect to something that humans value (such as health, well-being, wealth, property or the environment), often focusing on negative, undesirable consequences. Many different definitions have been proposed.

Risk - Wikipedia

How we handle risk and uncertainty A continuous focus on preparing for the unexpected is needed because we know that we are far from perfect when it comes to accurately assessing risks. We need only look to the World Economic Forum's (WEF) Global Risks Report 2020 , with its Global Risks Perception Survey, for a recent example of this point.
