rocks may be added in the future to both the study set and the bank. Review training videos and text to learn how to observe online images and video for characteristic properties of common igneous rocks.

IgnRx Study Guide

Volcanic and plutonic rocks are types of igneous rock. Volcanic rocks form when lava cools and solidifies on Earth, and plutonic rocks form when magma cools and solidifies below Earth. Learn about...

Igneous Rocks - Videos & Lessons | Study.com

Regardless of composition, minerals in igneous rocks will grow depending on the time allotted to it which is largely controlled by the environment where the magma/lava has cooled. Plutonic rocks have mineral grains easily identified with the naked eye or with the help of a hand lens. Volcanic rocks, on the other hand, have mineral grains difficult to be identified with the naked eye.
